The customer's requirements

Weighing the vehicle in dynamic mode to verify the total weight and avoid overloadings on the axles.

Our solution

Dynamic axle weighing system with WWSD platforms, for weighing in a very small and covered space each vehicle filled by the overhead dispenser.

One just needs to pass slowly on the weighing platforms, for the real-time and automatic acquisition of the weight of each axle, with the final printout of the weighing and total report.

Products

3590EKR indicator
in "AF09" version

WWSD platforms

WEIMONITOR software
for saving the weighs on PC
