

Application field

COLLECTION AND DISPOSAL OF WASTE

The customer's requirements

Create mobile stations for weighing the hospital waste and share the weighing data.

Our solution

Each station is made up of:

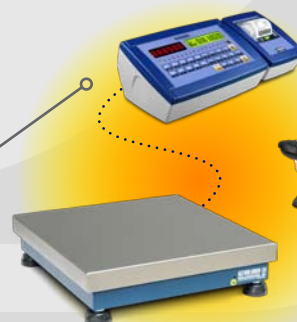

- a mobile cart in reinforced steel with high supporting surface;
- "T" series weighing platform with stainless steel loading surface;
- 3590 weight indicator connected to a printer, for issuing weigh tickets;
- software for collecting and sharing all the weighs, for further processing.

Products

3590EXP indicator with integrated printer

Scanner

T platform

WMT software

for the traceability and the integrated management of the complete waste cycle
